

(c) educate appropriate agency personnel regarding copyrights protecting computer software and the policies and procedures adopted by the agency to honor them; and

(d) ensure that the policies, procedures, and practices of the agency related to copyrights protecting computer software are adequate and fully implement the policies set forth in this order.

Sec. 3. Chief Information Officers Council. The Chief Information Officers Council ("Council") established by section 3 of Executive Order No. 13011 of July 16, 1996, shall be the principal interagency forum to improve executive agency practices regarding the acquisition and use of computer software, and monitoring and combating the use of unauthorized computer software. The Council shall provide advice and make recommendations to executive agencies and to the Office of Management and Budget regarding appropriate government-wide measures to carry out this order. The Council shall issue its initial recommendations within 6 months of the date of this order.

Sec. 4. Office of Management and Budget. The Director of the Office of Management and Budget, in carrying out responsibilities under the Clinger-Cohen Act, shall utilize appropriate oversight mechanisms to foster agency compliance with the policies set forth on this order. In carrying out these responsibilities, the Director shall consider any recommendations made by the Council under section 3 of this order regarding practices and policies to be instituted on a government-wide basis to carry out this order.

Sec. 5. Definition. "Executive agency" and "agency" have the meaning given to that term in section 4(1) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(1)).

Sec. 6. National Security. In the interest of national security, nothing in this order shall be construed to require the disclosure of intelligence sources or methods or to otherwise impair the authority of those agencies listed at 50 U.S. 401a(4) to carry out intelligence activities.

Sec. 7. Law Enforcement Activities. Nothing in this order shall be construed to require the disclosure of law enforcement investigative sources or methods or to prohibit or otherwise impair any lawful investigative or pro-

TECTIVE activity undertaken for or by any officer, agent, or employee of the United States or any person acting pursuant to a contract or other agreement with such entities.

Sec. 8. Scope. Nothing in this order shall be construed to limit or otherwise affect the interpretation, application, or operation of 28 U.S.C. 1498.

Sec. 9. Judicial Review. This Executive order is intended only to improve the internal management of the executive branch and does not create any right or benefit, substantive or procedural, at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

William J. Clinton

The White House,
September 30, 1998.

[Filed with the Office of the Federal Register, 8:45 a.m., October 2, 1998]

NOTE: This Executive order was released by the Office of the Press Secretary on October 1, and it was published in the *Federal Register* on October 5.

Remarks on the Legislative Agenda for Education

October 1, 1998

Thank you. Ladies and gentlemen, there really is nothing for me to say. I want to thank the previous speakers, each in their own way, for what they have given and what they will give to the children of our country. I believe that Secretary Riley is not only the longest serving but the most intensely committed and effective Secretary of Education this country has ever had.

I thank the Vice President for the vivid picture he painted for us of what is going on in these school buildings. We have been out there. We have been in these buildings. We have seen them. I believe the largest number of trailers or temporary classrooms, or whatever the politically correct term is, that I have seen at one school is a dozen in Florida. But they're everywhere. And there are a lot of magnificent old buildings in our cities that any person would be proud to go to school in if only they were fixed.

I'd like to thank Senator Daschle and Congressman Bonior and all the Members of Congress who are here whom they have represented today, for a genuine, consistent, passionate commitment to education that I have seen over my 6 years as President. It has never failed.

Thank you, Kathryn Scruggs, for giving your life to the education of our children, and from the look in your face and the lilt in your voice, I'd say it's been a good gift both ways. Thank you so much. Thank you.

I want to thank all the educators who are here, Arlene Ackerman, our friends from the AFT and the NEA and the other education associations. And I thank the young children for coming here today for reminding us what this is all about, welcome. We're glad you're all here from Stevens Elementary.

Let me begin where I meant to end: We can do this—we can do this. This is not an insurmountable problem. We have the resources; what we need is the will and the consensus. We need open minds and open hearts.

Yesterday I was privileged to announce to the American people that our Nation has triumphed over an enormous challenge. The red ink of the Federal budget deficits has been replaced by a surplus. We have brought order to our fiscal house. Now it is time to bring more learning to the schoolhouse.

In the end we needed a bipartisan consensus to pass a Balanced Budget Act that also had the biggest investment in the health care of our children in a generation and opened the doors of college wider than any act since the passage of the GI bill. That's what we need now.

Think of the challenges we have overcome as a people in the last 6 years. The crime rate has gone down to a 25-year low. The welfare rolls are at a 29-year low. It's the first time in 29 years we've had a balanced budget. The unemployment rate is at a 28-year low. The homeownership rate in this country is at an all-time high.

We are capable of overcoming challenges that people used to wring their hands about just a few years ago. But we have to put the progress of our people over partisanship and politics. So we all came here—let me join the chorus and say we came here not to ask

for much from the majority in Congress, just one day—one day for our children and their future; one day between now and the end of this congressional session to strengthen our public schools, to provide those 100,000 teachers for the smaller classes, to build or repair those 5,000 schools, to provide those after-school and summer school programs to help our students meet higher academic standards.

In recent days Congress has given us a glimmer of hope by passing a higher education bill that includes our initiatives on higher education, that will help millions of Americans receive the college education they need to compete in the global economy the Vice President so vividly described. It reduces the cost of student loans and provides for mentors for middle school students who can get a guarantee that they will be able to finance their college education if they stay out of trouble, stay in school, and keep learning.

I applaud the Congress, members of both parties who did this, including many who are here today. Congressmen Goodling and Kildee and Clay; Senator Kennedy and his Republican colleague, Senator Jeffords.

But though we have the finest system of higher education in the world and this is a good bill because it opened the doors to it even wider, we all know we have to have the finest K through 12 system of education in the world, and it has to be there for all of our kids as we grow increasingly more diverse. We know that nothing else we can do will more profoundly expand the circle of opportunity, more directly enhance our economic competitiveness, more clearly bridge the divisions of our society and bind us together as one nation.

And yet no issue has suffered more from misplaced priorities and partisan pursuits than America's public schools. Eight months ago I sent Congress the education agenda that has been described today. It demands accountability from everyone. It says to students: We expect you to meet high standards of learning and discipline, but we want to give you the help you need to meet those standards. It should be bipartisan in its appeal.

There was a time when education was completely bipartisan because no one asked you to register by party when you sign up for school, because every American, even Americans that have no children in our schools, have a direct, immediate, and profound interest in the success of our children's education.

Now, it is not too late. There is still time before the end of this session of Congress to spend that one day so we can cast that one vote to transform public education, to reduce the class sizes by adding 100,000 teachers, goals Senator Patty Murray and Congressman Bill Clay have been fighting for; to build or modernize those 5,000 schools across our country, goals Congressman Charlie Rangel and Senator Carol Moseley-Braun have worked for hard for, for a long time now.

The plan also would connect all of our classrooms in these new or renovated buildings to the Internet by the year 2000 and train teachers to use the Internet properly and to train our children to do the same. Every school in this country should be as modern as the world our children will live in. One day, one vote, could make it happen.

The third thing we want to do on that one day is to help our students meet higher standards; and if they're in troubled neighborhoods or come from difficult families or have school systems that haven't been performing well, we know they could be helped immensely with summer school and after-school programs, programs that Senator Barbara Boxer and Congresswoman Nita Lowey have been spearheading our fight for.

I have seen the benefits of these programs all across America. Last week I visited a school in Chicago where all the students came from the, I think now famous, housing project of Cabrini-Green. Students in Chicago no longer advance to the next grade unless they can pass tests to demonstrate that they know what they were supposed to learn. But if they have trouble passing the tests, they are not branded failures, because the system has failed them. Instead, they are offered academically enriched summer school and after-school programs. Over 40,000 children now get 3 hot meals a day there. The summer school is now the sixth biggest

school district in the United States. And guess what? In that school I visited in Cabrini-Green, the reading scores have doubled and the math scores have tripled in 3 years.

We only ask for one day for these initiatives, and, oh, by the way, one day for a decent appropriations bill. That's the job that Congress is supposed to do every year. And we are depending upon the leadership of Senator Tom Harkin and Congressman David Obey to see that we get that kind of appropriations bill. The one the House has passed does not meet that test.

Let me tell you a little about it. It shortchanges our youngest children in Head Start, our new initiatives in higher education for mentoring children, and preparing quality teachers. It shortchanges these after-school care programs. It shortchanges our major education program to help children learn the basics. It shortchanges my Hispanic education action plan. It shortchanges our efforts for school reform and high standards and our commitment to hook all those classrooms up to the Internet by 2000. It even shortchanges our efforts for safe, disciplined, drug-free schools. It shortchanges our young people in school-to-work efforts. It shortchanges workers who need retraining between jobs. It shortchanges our efforts to help disadvantaged youth get jobs. And in the House, unbelievably, it completely eliminates the summer job program for half a million young people. That is wrong. As your President, I will not stand for it.

The men and women who are up here with me stand ready to work with people in the other party, and they only ask them to do it for just one day, to strengthen our public schools for an entire new century, to affirm the bedrock American value that every child, regardless of race or neighborhood or income, deserves the chance to live up to his or her God-given abilities. Just one day to put in place a plan that will not only help those children but in so doing will make sure that America's greatest days lie ahead. I think it's worth one day, don't you?

Thank you very much, and God bless you.

NOTE: The President spoke at 3:40 p.m. on the South Lawn at the White House. In his remarks, he referred to Kathryn Scruggs, reading specialist,

Ashlawn Elementary School, Arlington, VA, who introduced the President; and Arlene Ackerman, superintendent, District of Columbia Public Schools. The President also referred to the American Federation of Teachers (AFT) and the National Education Association (NEA). A portion of these remarks could not be verified because the tape was incomplete.

**Statement on the Anniversary of the
Children's Health Insurance
Program**

October 1, 1998

Today marks the one-year anniversary of the new Children's Health Insurance Program (CHIP). This historic effort—which I called for in my 1997 State of the Union and signed into law last summer as part of the historic bipartisan Balanced Budget Act—is the largest children's health coverage expansion since the enactment of Medicaid over 30 years ago. CHIP provides \$24 billion to help States offer affordable health insurance to children in working families that make too much for Medicaid but too little to afford private coverage.

I am proud to announce that in its first year, nearly four out of five States are already participating in CHIP. A report released by the Department of Health and Human Services today finds that these State programs will provide health care coverage to over 2.3 million children when fully implemented. Many of these States have indicated they will expand their programs to even more children, and the remaining States have proposals that we expect to approve in the coming months.

However, much work remains to be done to improve the health of our Nation's children. We must work to ensure that every child eligible for CHIP gets enrolled. Equally important, over 4 million uninsured children are eligible but not signed up for Medicaid. Educating families, simplifying the enrollment process, and making health insurance a national priority requires a sustained commitment from the public and the private sector. This has been and will continue to be a top priority for my administration. I have directed 12 Federal agencies that serve children and families to reach out and enroll uninsured children and am extremely encour-

aged by our partnership with the States and the private sector to help meet this challenge.

We know that children with insurance are healthier—getting more regular checkups, more routine immunizations, and fewer ear infections. On the one year birthday of CHIP, let us recommit ourselves to providing affordable health coverage to the millions of American children without insurance.

**Statement on House Action on the
“Year 2000 Information and
Readiness Disclosure Act”**

October 1, 1998

I am pleased that the House today joined the Senate in passing the “Year 2000 Information and Readiness Disclosure Act,” a bill that will provide limited liability protections for sharing information while protecting consumers from misleading statements. This important bipartisan legislation, based on a proposal by my administration, will help our Nation prepare its computer systems for the new millennium.

By encouraging greater information sharing about Y2K solutions, this legislation will help businesses, State and local government, and Federal agencies in their efforts to address the year 2000 computer problem. I look forward to signing it into law.

**Proclamation 7130—National Breast
Cancer Awareness Month, 1998**

October 1, 1998

*By the President of the United States
of America*

A Proclamation

For the millions of us who have lost loved ones to breast cancer, this annual observance brings with it both sorrow and hope—sorrow that medical breakthroughs came too late to save a beloved relative or friend, and hope that new efforts in research, prevention, and treatment will protect other families from suffering the impact of this devastating disease. Recent declines in the rate of breast
